Registered winter team: roster changes

1. Open My Teams and choose Open roster on the registered winter team. Confirm the team and season before editing. You do not need a new registration or renewal.

2. To add a player, open Actions > Invite a player. If the roster is locked or invitations are unavailable, contact the league.

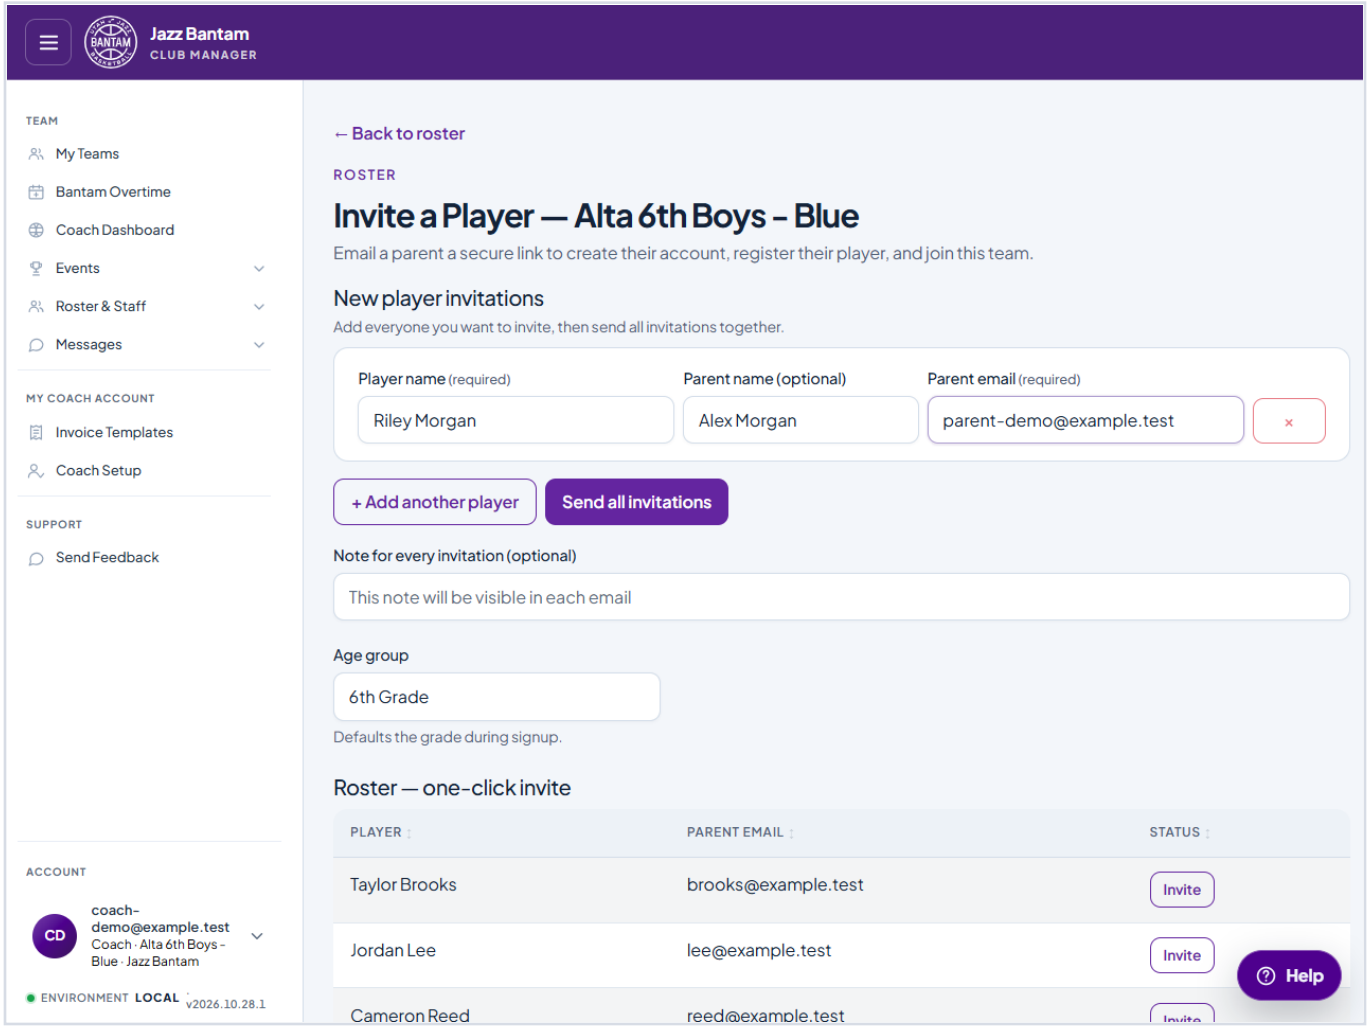

The Actions menu opens invitations for the selected team.

Synthetic demo screenshots. Names, prices and tax rates are examples; use the values shown in your account.

Registered winter team: roster changes

3. Enter the player's name and parent contact information on the invitation page. Follow any coach-payment instructions shown before sending. Parents complete identification, waiver, apparel details and any required payment.

4. Check Pending invitations on the roster. Correct a mistyped parent email or resend an invitation as needed. Confirm the player appears on the roster after the parent finishes.

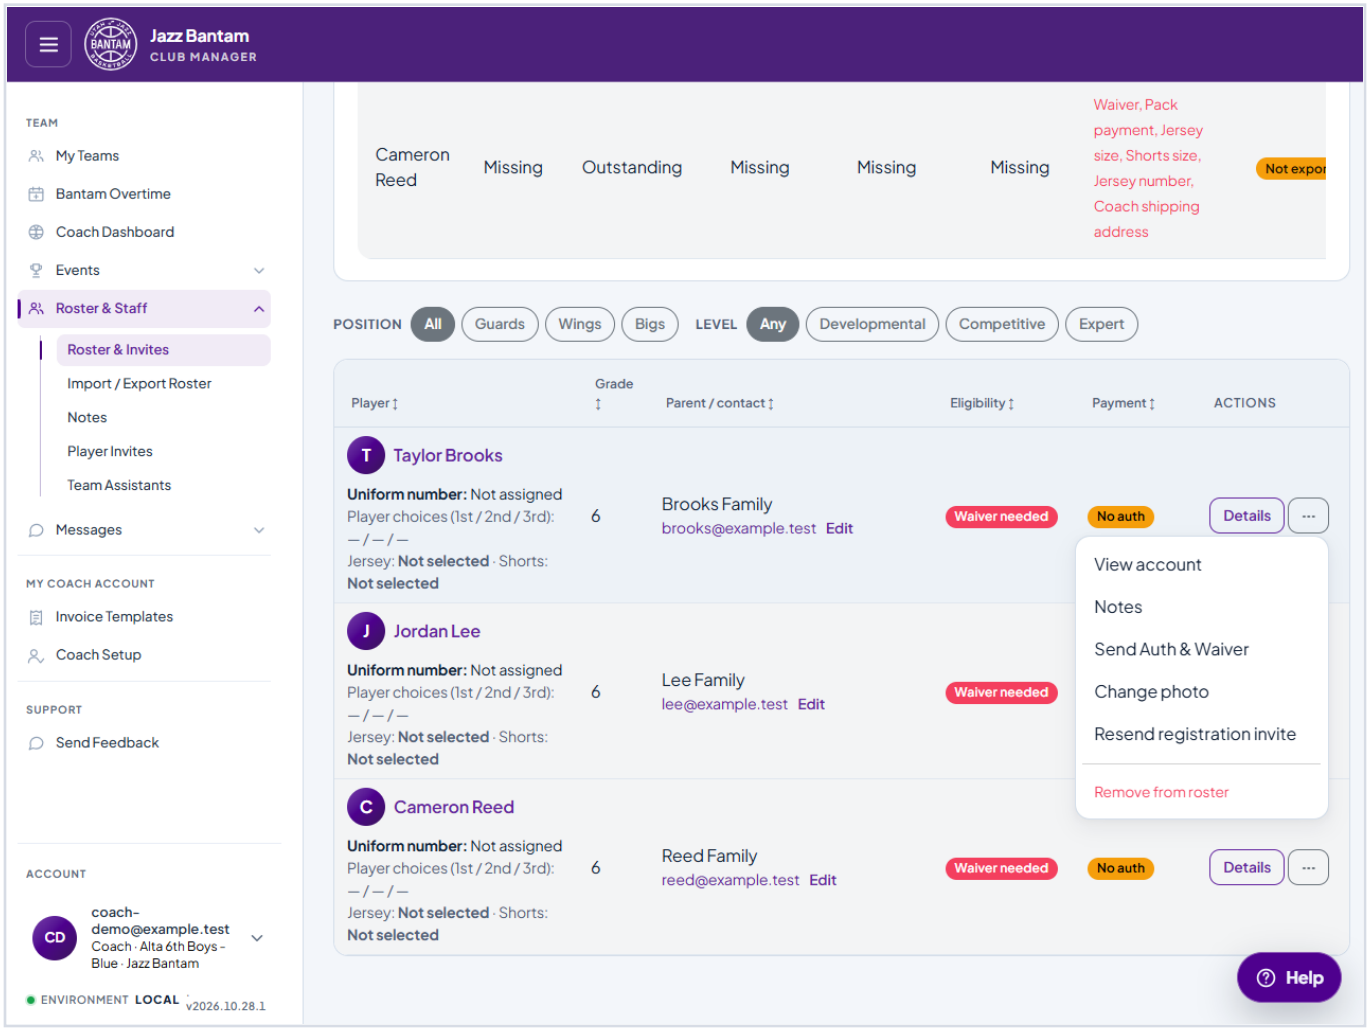

Follow the payment instructions shown for your team.

Registered winter team: roster changes

5. To remove a player, open that player's menu and choose Remove from roster. Verify the winter team in the confirmation before proceeding. This removes only the selected membership, preserves other seasons and financial records, and does not refund a payment.

6. Review the final winter roster and outstanding registration requirements. Contact the league for payment reconciliation or annual-pack issues; do not register a duplicate team.

Use the individual player menu for Remove from roster.
